ENGINEERING, PROCUREMENT, CONSTRUCTION,
OPERATION & MAINTENANCE

Main Figures

BFP Group

BFP Service is part of the BFP Group, a well-known engineering company active in the renewable energy sector for more than twelve years. BFP is a dynamic and flexible EPC company with extensive experience in the Construction, Operation and Maintenance of renewable power plants.

8 years of experience

Active in the renewable energy sector for over five years, BFP SERVICE is a dynamic and flexible engineering company with extensive experience providing technical services for the production, transmission and supply of electrical energy, in particular from renewable sources such as sun and wind.

10+ collaborating engineers, technicians and electricians

With a multidisciplinary and highly experienced staff (1 general manager, 3 engineers, 1 surveying technician, 4 electricians, 3 O&M workers), BFP SERVICE's skill set ensures the complete and integrated management of all design and implementation processes, mostly performed in-house also with the BFP Group resources.

Wind and PV 65+ MW O&M service

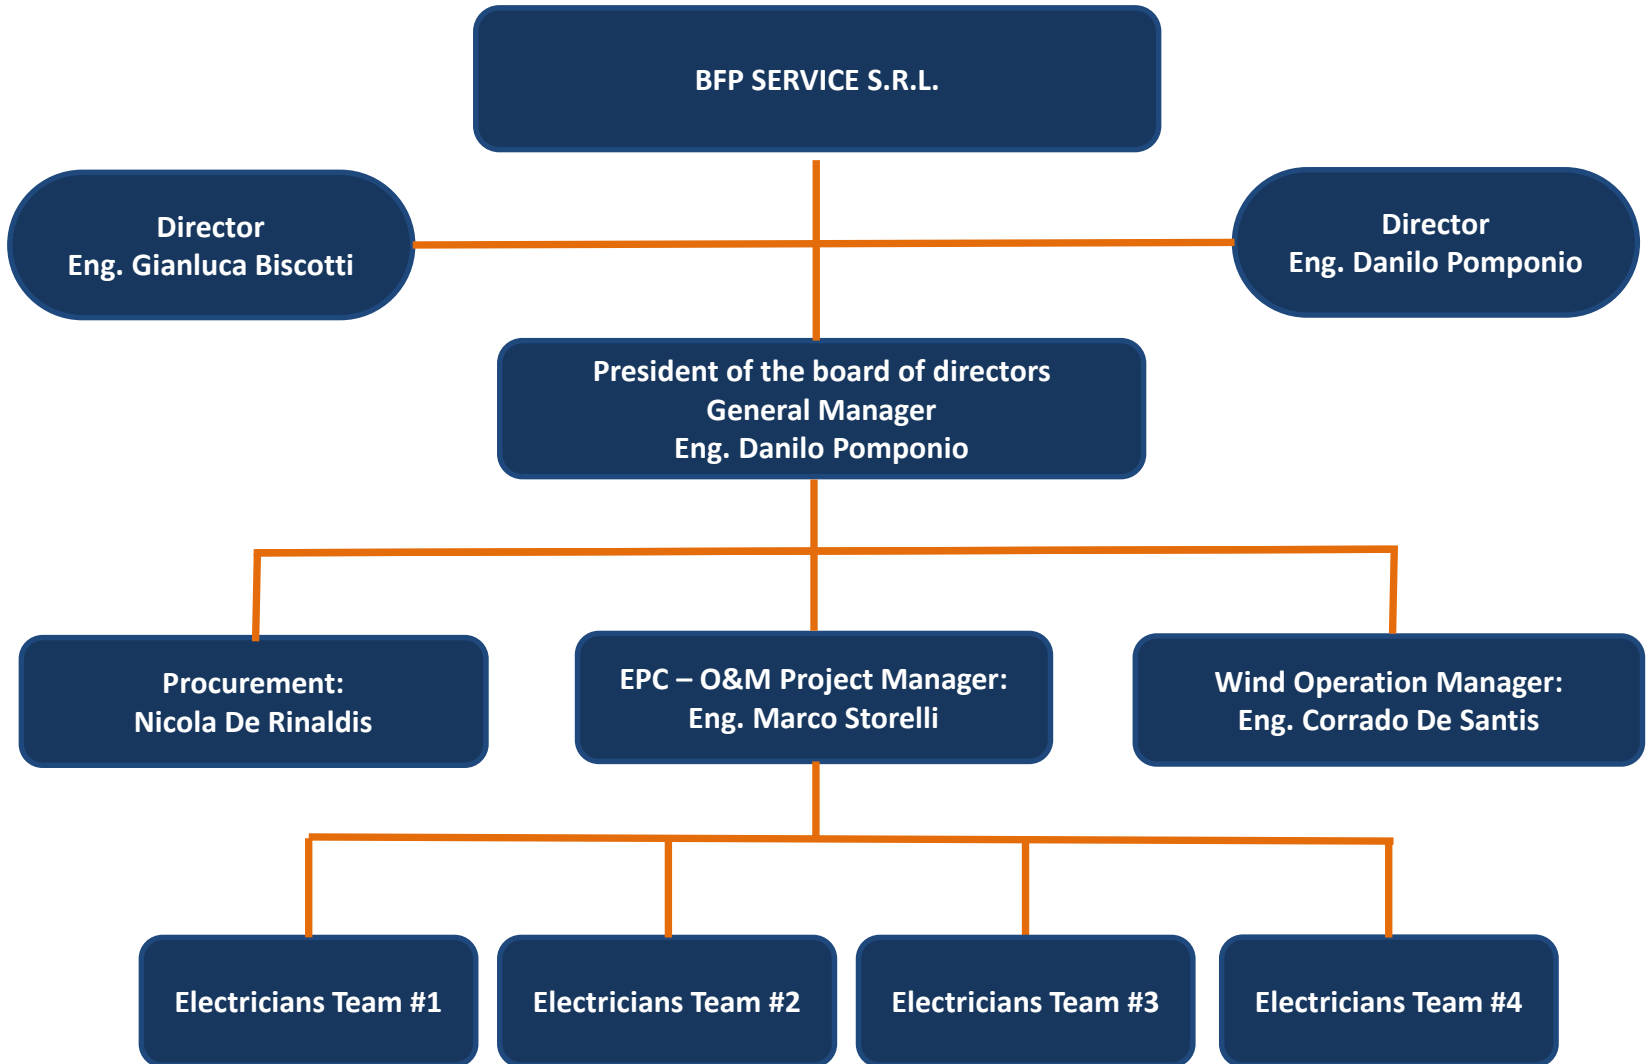

BFP mission

The company mission is to work devotedly and always keep up to date with latest industry news and innovations, guaranteeing clients certain and timely results, with respect for agreed terms and deadlines.

Company Profile

- A BFP subsidiary created in 2011 to cater to the **renewable energy O&M market** in Italy
 - Founded on the **consolidated experience of Studio Tecnico BFP S.r.l.**
- **Engineering & Construction services** for the development of small and medium scale Renewable Energy Systems
 - **Operation & Maintenance services** for medium & large-scale plants, with currently 30+ MWp under contract
- Guaranteed **first-class O&M performance** using site-specific programmes designed to ensure enhanced owner value
 - Focus on maximising production, minimising operational risks and **improving long-term shareholder value.**
- The ideal partner for both national and international investors seeking to **optimise & economise plant operations**
 - A single point of contact for the client, offering a **360° service** through its complete group structure

Organisation

HR

- 3 Engineers
- 2 Technician
- 8 Electricians and O&M Workers

Means

- 🔥 3 Vans
- 🔥 2 Lawn tractors
- 🔥 5 Brushcutters
- 🔥 Test Instruments

References

Maintenance services

- Customized Preventive Maintenance services (such as: grass cutting, AC/DC check, cabinet cleaning)
- IR thermal inspection of modules by drone and hand thermal camera
- Performance analysis and degradation analysis by IV-Curves measurement and instantaneous PR measurement
- Insulation resistance of cables measurement
- Corrective civil & electrical maintenance
- PV module substitution and integration
- Transformer and MT box substitutions
- Copper cable substitution
- Inverter substitution
- Video surveillance & alarm system correction and integration

Summary of Services

Operation & Monitoring

Preventive & Corrective Maintenance Services

Energy production optimisation

Testing

Inverter revamping

EPC for Renewable Power Plants and MV networks

Asset management services
